

Installing the EDGE Trolley on Your Zip Line

DO NOT INSTALL without reading the Safety Warning!

Drop the trolley onto the line.

Align the large hole in the harness adaptor with the large hole in the trolley.

Slide the handle into the large hole.

Press the spring button and push the handle in until it snaps firmly into the harness adaptor.

Slide the other grip on.

Properly Assembled.

SAFETY WARNING

DO NOT use Alien Flier Zip Line Products until you have read and fully understand the SAFETY WARNINGS below!

Assumption of Risk & Liability Waiver

Allowing your children, friends, or anyone else's children to ride on a zip that has not been installed properly, maintained as instructed and inspected for safety is tantamount to endangerment and negligence. Please use common sense and remember that you are responsible for your decisions as well as the outcome. Alien Flier LLC and its associates are not responsible for anything that may go wrong with your zip line installation, trees, gear, trolleys, or related components. We are not responsible for any injuries or deaths that occur during the construction or operation of your zip line or any other products. No warranty related to zip lines is expressed or implied by installation tips, construction guides, or by any representative of Alien Flier LLC, including warranties of merchantability or fitness. Ensure you educate yourself on the proper installation, maintenance and use of everything related to your Alien Flier product. **Seek competent local assistance** if you are unsure of how to work with trees, cable installation or maintenance. All information related to zip lines received from any representative or printed or digital material distributed by Alien Flier LLC is only an opinion and shall not be interpreted as expert or professional advice. Contact component manufacturer for information about warranty and use of their products. The customer accepts full responsibility for any and all incidents, accidents, injuries, deaths, and property damage that may occur during the building and operating of your zip line or other products. Serious injury and death may occur as a result of improper use of this equipment. **DO NOT attempt to use this equipment without proper training!** Inspect all equipment before each use and destroy any gear that is damaged, worn, or does not pass inspection. Any person using these products is responsible for the proper care and maintenance of these products. **WHEN IN DOUBT, REPLACE IT!** Any person using these products in any manner assumes all risk and responsibility for any damage or injury, including death, dismemberment or worse. Any litigation involving these products will be defended and challenged according to the above release of liability.

- **A zip line can be very dangerous.**
Do not use this kit if you do not understand the risk involved in riding a zip line. The cable can hold weights many times that of most riders and is the least likely part of the system to fail. Pay special attention to your workmanship making the loops and slings for these are the areas where failures are more common to occur.
- **Use under adult supervision only.**
- **Do not mount your zip line to anything other than proper size trees.**
Inspect the entire zip line system including the pulley and sling for damage or wear before every use. DO NOT ride a system that is damaged.
Falling + Fast Speeds + Rough Landings (stumps, rocks etc.) = Serious injury, death or worse
- **Ignoring safety recommendations = Serious injury, death or worse**
- **Poor installation workmanship = Serious injury, death or worse**
- **DO NOT attach items to the equipment that are not specifically designed for use with the equipment, such as, but not limited to, jump ropes, clothesline, pet leashes, cables, chain and rope as they may cause a strangulation hazard.**
- **Dress appropriately with well-fitting shoes and no ponchos, scarves or other loose fitting clothing which is potentially hazardous.**
- **Single riders only! Do not ride double. Never overload the cable. We do not recommend riders over 220 lbs.**
- **Always hold onto the T-bar with both hands. ALWAYS ride seated if seat is attached.**
- **Do not jump off your zip line while you are traveling on it.**
- **Make sure there are no obstructions in the path of the rider.**
- **Do not install a zip line around a high voltage line, over roads or ravines.**
- **Never set the cable rate of descent to unsafe angles or heights.**
- **Always include a properly installed and maintained safety back up STOP BLOCK in conjunction with all of our models.**
